

Presents:

Exploring the Future of Enterprise Systems

On **February 12, 2009**, the MIT Enterprise Forum of Atlanta, in partnership with the Oracle Applications User Group, Southeastern Software Association and the Metro Atlanta Chamber Technology Marketing Council, will present **"Exploring the Future of Enterprise Systems."** **Charles Phillips**, President of **Oracle Corporation** will lead off the studio broadcast event with his keynote address, **"It's always been, continues to be, and will always be about information and information management."** Please join us as our panel of technology and wireless superstars look into the future of software, discussing critical questions regarding the future of technology:

- How will companies handle the explosion of the volumes of information?
- With growing talk about client-server, network computing, SaaS and cloud computing, which of these are fashionable buzzwords and which represent long-term value for business?
- Are cloud computing and SaaS models practical for managing applications and information?
- If information is a key asset to businesses, how will enterprise software enable the management, sharing and storage of that data?
