

Cingular Wireless Oracle 11i Financial applications implementation

On April 1st, 2004, Cingular Wireless successfully launched its new Oracle 11i system supporting its operations using a suite of Oracle Financial applications. The Cingular solution includes Oracle 11i modules for CRL-enabled Fixed Assets and Project Costing, General Ledger, Inventory, Order Management, Work-In-Process, Bill of Materials, Accounts Receivable, Accounts Payable, Cash Management, Procurement, and iProcurement. These Oracle modules are interfacing with a detailed asset tracking system as well as a warehouse management system and two planning systems to create Cingular's comprehensive end-to-end solution. IBM Business Consulting Services teamed with Oracle Consulting as the integrators to deliver the solution.

The presentation will cover

- Project Management Overview
- Team Structure
- Accounting Functionality Implemented
- Lessons learned

Cingular Wireless is the second largest wireless company in the U.S. and is dedicated to self-expression and customer-friendly service. A leader in mobile voice and data communications, Cingular is a wireless company determined to promote the individual to a new level and to create a personal relationship with each of its customers. Cingular Wireless serves more than 22 million voice and data customers across the United States. Cingular provides cellular/PCS service in 43 of the top 50 markets nationwide. Cingular's Mobitex-based wireless packet data service operates throughout the United States, covering more than 93 percent of the urban business population located in 492 Metropolitan Statistical Areas (MSAs) and non-MSAs with a total population of 200 million people. It is a managed account within IBM BCS's Communications Business Unit, with primary locations in Atlanta, GA and Dallas, TX.
