

The Challenges of Point Release Upgrades

by Arul Murugan, enrich IT (arul@enrichIT.com)
and Jeff Walsh, CSC Consulting

Point release upgrade means upgrading the application within the 11i (11.5.x) e-business suite as Oracle introduces new releases. An example of a point release upgrade is moving from 11.5.7 to 11.5.9

This discussion will focus upon the terminology, techniques, technology, and experiences of upgrading Oracle E-Business Suite 11i. We will cover both functional and technical challenges experienced in recent E-Business Suite point release upgrades.

The panel discussion will cover the following topics

- Why to do a point release upgrade
- Challenges of changing the technology stack during a point release upgrade
- Making down time less painful
- Incorporating new products / functionalities along with a point release upgrade
- Handling the function changes associated with a point release upgrade
