Objective

Education

Networking

Share Experiences

Commiserate

The Atl-OAUG has been formed for the functional user to hear topics specific to their needs and to network with other users in the local area. The price is right (free!), the distance is near (local!) and the time commitment minimal (2 1/2 hours). This is an opportunity to involve many of your users that would not otherwise be able to attend national or regional meetings but have needs that can be met in the local area. Please distribute this to your primary functional user in each of your Oracle financial applications and encourage their participation. This group offers a low cost, convenient, educational and networking opportunity.
